

WEIGHT GUIDELINES

FOR ALL TANDEM TOW DOLLY TRAILERS

To determine which Tow Dolly may be right for you, follow these instructions and use the examples below as a guide.

Step 1 - Determine the front end weight of your car to be towed. To do this you must weigh the front end of your car (at a truck stop, etc.). As an estimate, you can multiply the curb weight of your car by 62% for a front wheel drive, and by 52% for a rear wheel drive car. These percentages are approximations and should not take the place of an actual weight.

Step 2 - Determine the weight of the secondary vehicle. (ATV, Golf Cart, Motorcycles, Etc.).

Step 3 - Add these two weights together along with the weight of the Tow Dolly itself. You can subtract 200 pounds that the tongue carries. This will give you your GAWR (Gross Axle Weight Rating), which should be less than the GAWR number in the table below.

MODEL	STD TOW DOLLY	HD TOW DOLLY	HDXL TOW DOLLY
GAWR	3500 lbs	5000 lbs	5000 lbs
GVWR	5000 lbs	8000 lbs	8000 lbs
TOW DOLLY WEIGHT	835 lbs	950 lbs	1050 lbs
EXAMPLE	Car 1835 lbs 2nd Vehicle + 750 lbs Tow Dolly + 835 lbs Tongue Wt - 200 lbs Total Weight = 3220 lbs	Car 2800 lbs 2nd Vehicle + 800 lbs Tow Dolly + 950 lbs Tongue Wt - 200 lbs Total Weight = 4350 lbs	Car 1935 lbs 2nd Vehicle + 800 lbs 3rd Vehicle + 800 lbs Tow Dolly + 1050 lbs Tongue Wt - 200 lbs Total Weight = 4385 lbs

GAWR: The Gross Axle Weight Rating, is the maximum amount of weight the axles is rated to carry.

GVWR: Gross Vehicle Weight Rating. The maximum weight that the Tandem Tow Dolly is rated to carry.

GVW: The Gross Vehicle Weight, will be the weight of the loaded Tandem Tow Dolly as you would use it. To obtain the GVW for your particular needs, total up the Tandem Tow Dolly (x lbs), plus the towed car (x lbs), plus the secondary vehicle(s) (x lbs). This total must not exceed the Tandem Tow Dolly GVWR.

PLEASE NOTE:

The above information is for estimating only; you are responsible for complying with all maximum weight requirements when using the Tandem Tow Dolly system.
